Receivable for Scientific Review

The purpose of the agreement is to ensure that planning and implementation of the Central Valley Project Improvement Act, Bay Delta Conservation Plan / Delta Habitat Conservation and Conveyance Program, Collaborative Science and Adaptive Management Program (CSAMP), IEP and Biological Opinion-associated initiatives are based on sound, independent science and engineering principles and practices through the independent peer review panels. These panels will evaluate programs, plans, proposals, protocols, reports, manuscripts, conceptual, statistical and numerical models and other products generated by these planning and implementation efforts. These reviews help to ensure that action being taken to restore, conserve, monitor and study ESA species and their habitats are conducted effective, efficiently and in a cohesive manner.

ALIGNMENT WITH THE DELTA PLAN

GOAL

Protect, Restore, and Enhance the Delta Ecosystem

CORE STRATEGY

ER CS 2

Delta Ecosystem

Ch 4 - ER policies and recommendations: Restore habitat

PERFORMANCE MEASURE(S)

ER P3-01

Protect Opportunities to Restore Habitat

100 percent of all proposed actions other than habitat restoration have clearly demonstrated that significant adverse impacts to the opportunity for habitat restoration as described in ER P2 were avoided or mitigated.

ER R2-01

Prioritize and Implement Projects that Restore Delta Habitat

Bay Delta Conservation Plan implementers, California Department of Fish and Wildlife, California Department of Water Resources, and/or the Sacramento-San Joaquin Delta Conservancy identify number of projects and amount of funding for priority habitat restoration projects.

ER R2-02

Prioritize and Implement Projects that Restore Delta Habitat

The preponderance of proposed habitat restoration projects is within the six priority areas and considers landscape elements and improvement in water quality.
