**American River Watershed, Common Features**

This project record represents the compiled total for all American River Common Features (ARCF) elements. The reported figures are for work related to WRDA 96 and WRDA 99 sites.

## ALIGNMENT WITH THE DELTA PLAN

### GOAL

Reduce Risk to People, Property, and State Interests in the Delta

### CORE STRATEGY

#### ER CS 2

Delta Ecosystem

Ch 4 - ER policies and recommendations: Restore habitat

### *PERFORMANCE MEASURE(S)*

#### ER P2-01

#### **Restore Habitats at Appropriate Elevations**

100 percent of proposed actions that include habitat restoration in the Sacramento-San Joaquin Delta meet one of the following standards: (1) are consistent with the text of Appendix 3 (see Appendix B of the Delta Plan), based on the Conservation Strategy for Restoration of the Sacramento-San Joaquin Delta Ecological Management Zone and the Sacramento and San Joaquin Valley Regions; or (2) are not consistent with the elevation map (see Figure 4-6 of the Delta Plan), but the deviation is supported by a rationale based on best available science.

#### ER P4-01

#### **Expand Floodplains and Riparian Habitats in Levee Projects**

100 percent of proposed actions to construct new levees or substantially rehabilitate or reconstruct existing levees in the opportunity areas defined in Appendix 8 (see Appendix B of the Delta Plan) demonstrate that they have evaluated alternatives (including use of setback levees), and where feasible, have incorporated such alternatives into levee projects to increase the extent of floodplain and riparian habitat.

### CORE STRATEGY

#### RR CS 3

Reduce Risk in the Delta

Ch 7 - RR policies and recommendations: Prioritize flood management investment

### *PERFORMANCE MEASURE(S)*

#### RR P1-01

#### **Prioritization of State Investments in Delta Levees and Risk Reduction**

The Delta Stewardship Council facilitates development of funding priorities for State investments in Sacramento-San Joaquin Delta levees by January 1, 2015.
